COMPANY PROFILE

DANOBATGROUP

SORALUCE  DANOBAT
INDEX

ADDING KNOWLEDGE
Working for you

INDUSTRY APPLICATIONS
Specialised in parts for cutting-edge sectors

THE OFFER THAT MAKES A DIFFERENCE
The option chosen by the most demanding clients

DIGITAL INDUSTRY
Ready for the factory of the future

HI-TECH INSTALLATIONS
Spaces for vision and creation

RESEARCH & TECHNOLOGY CENTRE
Always at the forefront

INTERNATIONAL PRESENCE
We are where our clients are

EXPERIENCE AND EXPERTISE
The solid base of a large group

SOCIAL COMMITMENT
Committed to the future
We are accessible and work in close collaboration with the client. From the beginnings of an idea to its successful conclusion.

We provide customised solutions throughout the project, using innovative technology and practical answers.

We work with the client to perfect and update projects during the whole life of the product.
WE PROVIDE SOLUTIONS FOR CRITICAL PARTS OF THE MOST DEMANDING SECTORS.
INTELLIGENCE RESPONDING TO THE CHALLENGES OF THIS CENTURY.

We provide innovative solutions and services supported by our skills in mechanical and control technology, by applying the latest developments in the digital sphere and by our expertise in manufacturing processes.

Intelligent technology that reaches the market through our two prestige brands:

Advanced solutions

TAILORED AND CUSTOMISED.

Our robust experience in advanced machining processes enables us to design customised solutions to meet the needs of each client, which includes preliminary engineering work, study of the machining processes, technical specifications of the equipment, installation requirements and the work team needed to tackle this type of challenge.

Our equipment includes the highest quality components to ensure the reliability, rigidity and thermal and dynamic stability of the machine throughout its life, in response to our clients’ demands and the precision required.

We provide fully automated solutions integrating manufacturing and inspection equipment with robotic parts handling systems, managed by a control system developed by us, and we take care of the installation and commissioning of the lines anywhere in the world.
Advanced services

QUALITY SERVICE AT EVERY STAGE OF THE PROCESS.

Our technical team carries out a complete study of the manufacturing process for each part, to optimise machining times and ensure the highest finished quality for the component. They also define the set-up and technical specifications for the machines and equipment needed to achieve production objectives.

We ensure maximum availability of our products and guarantee to have the spare parts required for maintenance anywhere in the world, with qualified local staff and maintenance schedules adapted to each need throughout the life of the product.

We provide training in programming, operating and maintaining the equipment and offer assistance for production, using the latest diagnosis and servicing technology.

This offer of advanced services is completed by implementing the latest developments in the digital field that improve the quality of the engineering, maintenance and training services mentioned above.
WE MAKE THE FACTORY OF THE FUTURE A REALITY.

Aligned to the growing digitalization of the industry, we manufacture machine tools and intelligent solutions to increase productivity, efficiency and flexibility by managing all information on the status of the machine and the manufacturing process in real time.

**H.M.I. (HUMAN MACHINE INTERFACE)**
Increased machine availability.

**CONTROL SYSTEM**
Application for integral control of manufacturing lines.

**INTELLIGENT COMPONENTS**
Intelligent devices to improve the precision, reliability and productivity of the machine.

**DATA SYSTEM**
Constant information on the status of the machine and process.
ADVANCED INSTALLATIONS TO DEVELOP CUTTING-EDGE SOLUTIONS.

We have advanced workshops where we put into practice the skills required to provide the best solutions for our clients, and we are constantly investing in cutting-edge installations to implement a highly efficient production model.

SPECIAL INSTALLATIONS FOR MACHINING KEY PARTS
We have two manufacturing plants engaged in machining the most important pieces for our machines to ensure that high-precision parts are supplied for our own use.

HEAD MANUFACTURING AREA
Design and production of milling-boring heads are fully integrated at the advanced head manufacturing center. From the design to the final product, the head center conducts the manufacturing, assembly, verification and running-in processes of the milling-boring heads.

WHITE ROOM FOR SPINDLES AND SUB-UNITS
Strict measuring and control of components, assembly according to protocols and development of verification and quality controls are carried out in a “white room” under humidity and temperature control.

A SHOWCASE IN THE HEART OF EUROPE
A modern training, service and technology centre in the heart of Europe is the perfect showcase to assess the capacity and potential of our high-end products.
WE FIND ANSWERS TO THE CHALLENGES OF THE FUTURE.

Our technology centre works with the most prestigious research institutions in the world to enable us to always be at the forefront and incorporate the latest developments into our products, while at the same time using our expertise and specialised knowledge.

The result is unique innovations of their type which are later incorporated into our solutions.

8% OF TURNOVER INVESTED IN R&D&I

30 YEARS A CENTRE WITH AN OUTSTANDING TRACK RECORD

WORK TEAMS WITH RENOWN PhDs

COLLABORATION WITH THE TOP INTERNATIONAL UNIVERSITIES
WE ARE WHERE OUR CLIENTS ARE.

Our international presence is supported by our own sales and service structures close to each customer. We have our own infrastructure and highly qualified experts, trained in the culture and values of the DANOBATGROUP who also provide local knowledge.

Our commitment to clients translates into a service that adds value. Professional service and efficient local support: faster answers, close at hand and reduced downtimes...

> 90% OF PRODUCTION IS EXPORTED TO THE MOST DEMANDING MARKETS
We are a solid and reliable group supported by the experience gained over more than 60 years as one of the leading machine tool groups in Europe.

We have the resources, history and financial solvency to meet the demands of the most discerning companies in the world. From the beginning, leading brands have trusted in us and continue to do so.

We belong to the MONDRAGON Corporation. This gives us the intellectual horizons and financial solvency to enable us to continue to meet the challenges the future brings.
WE HAVE A TALENT FOR IMAGINATION AND A COMMITMENT TO MAKING DREAMS COME TRUE.

Our actions rest on the principles of transparency, participation and efficiency in order to transmit fundamental values to people, the environment and society.

COMMITTED PEOPLE
People are our main asset. Our success is based on the commitment and active involvement of our highly qualified professionals.

We are all shareholders of the company, which is the strongest incentive for contributing to its growth and success, and undertaking the most difficult technological developments.

SUSTAINABLE GROWTH
We pursue sustainable growth by respecting the environment in our day-to-day activities. We work to increase our clients’ productivity by introducing the latest sustainable technological solutions that give optimum performance, reduce energy consumption and pollution.

EXPERTS, QUALIFIED, SPECIALISED AND WITH A VISION FOR THE FUTURE
Continuous learning is an essential part of our work team. We are constantly improving our skills and knowledge to always keep you one step ahead.

SOCIAL RESPONSIBILITY
We are strongly committed to society.
We play an active part in the communities we serve and work with. We promote initiatives to improve culture, environment, employment and welfare.
